

AEI International Student Design Competition Competition Program

Addendum 2020-02

Additional Information

The issuance of Addendum 2020-02 is intended to clarify some questions that have been raised by the registered student teams during the RFI process.

1. Drawings for 1920s portion of War Memorial Hall. The competition committee has received drawings from the design team for the 1920s portion of War Memorial Hall. These drawings will be made available through the file share website where you downloaded the model and other competition information. As a reminder, do not contact the design team or the owner for additional information.
2. For clarification, student teams may consider the 1970s building as a demolition and rebuild but must maintain the footprint of the existing 1970s building in the redesign.

The information in this addendum supersedes any previous RFI responses.

As a reminder, do not contact the design team or the owner for additional information. Questions should be directed through the RFI process.
